DETAILED ACTION

Summary

Applicant is reminded that the office has not received IDS as of this date.

Receipt of Applicant's Response filed on 09/18/2007 is acknowledged. Claims 1-11 are pending. Claims 2-11 are withdrawn. Claim 1 is rejected.

Applicant's election with traverse of Claim 1 in the reply filed on 09/18/2007 is acknowledged. The traversal is on the ground(s) that a search for the Group I will necessarily overlap with a search for Groups II-IV as originally presented and is therefore not independent and is only distinct. This is not found persuasive as the special technical feature of the original claims as filed is "a fat composition of high purity diglyceride containing conjugated linoleic acid", which is taught by the prior art as detailed in the restriction requirement. As such, claims 2-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species and invention, there being no allowable generic or linking claim. Claim 1 will be examined in the instant application. Applicant timely traversed the restriction (election) requirement in the reply filed on 09/18/2007. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1615

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by US 6,432,453 B1 ('453).

- '453 teach food supplement compositions comprising glycerol esters of conjugated linoleic acid, wherein the glycerol esters are selected from the group consisting of monoglyceride, diglyceride, triglyceride and mixtures thereof ('453 abstract, claims 1-3). '453 also teach various methods of preparing the diglyceride conjugated linoleic acid such as transesterification, or via acid by reacting CLA and glycerol ('453, col. 5, lines 35-41).
- '453 teaches that the CLA glycerol ester is provided in the dietary supplements from about 32% to about 91% by weight of the conjugated linoleic acid (claim 1) and that the glycerol ester is selected from the group consisting of monoglyceride, diglyceride triglyceride and mixtures thereof (claim 2).

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by US 2002/0147356 A1 ('356).

- '356 teaches food supplement compositions comprising glycerol esters of conjugated linoleic acid, wherein the glycerides are comprised of a blend of monoglyceride, diglyceride, and/or triglyceride and mixtures thereof ('356 abstract, claims 1, 3, 5). '356 also teaches various methods of preparing the

Art Unit: 1615

diglyceride conjugated linoleic acid such as dehydrating castor oil, or isomerizing vegetable oil ('356, claims 11-16).
